

Fuchs Star

electrical stripping machine
for varnished wires

Specification

Fuchs Star works with 230 V of direct current and is connected directly to the 230-V net (or 115 V). In the blade head are three rotary hard metal blades, with shut according to speed, as the result of the centrifugal strength, mounted. Infinitely variable regulation allows precise setting of the desired speed on the respective wire strength.

Application

Wire up to desired stripping-length in standing still blade head introduce. Start speed and pull back wire slowly.

Types

Type 02 for wire \varnothing 0,2 — 1,5 mm
Type 03 for wire \varnothing 0,3 — 4,0 mm

Technical Data

Stripping length:	32 mm maximum
Stripping distance:	3 mm
Power supply:	230 or 115 V
Power consumption:	18 Watts
Length:	170 mm
Diameter:	50 mm
Weight:	550 g
